

**Paragon Wireless Receives TMC Labs 2006 Innovation Award for  
*INTERNET TELEPHONY*<sup>®</sup> Magazine**

***Paragon Wireless' hipi*<sup>™</sup>  
Singled Out for Outstanding Innovation**

June 26, 2006 – Richardson, TX — Paragon Wireless announced today that Technology Marketing Corporation's TMC Labs division named the Paragon Wireless **hipi**<sup>™</sup> dual-mode phone as a 2006 Innovation Award winner from *INTERNET TELEPHONY* magazine.

"We are extremely excited that Paragon Wireless and our **hipi**<sup>™</sup> phone have been chosen as innovation award winners," said Ilkka Pouttu, Vice President, Paragon Wireless. "TMC does a tremendous service to the industry by examining a myriad of products in the VoIP space and recommending those they feel are significantly ahead of the industry as a whole. Our **hipi**<sup>™</sup> phone is a dual-mode phone enabling users to communicate in ways they never have before, by enabling one phone to function as both a cellular and VoIP communications handset," said Pouttu.

"Paragon Wireless has clearly demonstrated to the staff of TMC Labs that *Paragon Wireless'* product and services are truly innovative in the burgeoning VoIP/IP telephony industry. Never before in this industry has there been a greater need to highlight the most inventive VoIP products and services," said Rich Tehrani, Group Publisher and Editor-in-Chief of *INTERNET TELEPHONY*.

"The TMC Labs Innovation Awards are based solely upon the uniqueness of the company's offering or how pioneering the particular product or service is. It is not based on company revenue or number of products sold. It is based on the concept that the **hipi**<sup>™</sup> is innovative." according to Tom Keating, CTO and TMC Labs Editorial Director.

Keating continued, "Paragon Wireless and their **hipi**<sup>™</sup> dual-mode phone deserves this great honor for creating a ground-breaking VoIP product or service. I look forward to seeing other innovative solutions from Paragon Wireless as they continue to contribute to the future of the VoIP/IP telephony marketplace."

The TMC Labs 2006 Innovation Award highlights will be published in the July 2006 issues of *INTERNET TELEPHONY* magazine.
